	Course level Master						
	Description	In this course students will learn in-depth information about personalities. They will gain a better understanding about those around them and also more about who they are and how they got to be that way. This course starts with a basic introduction of personality. It then goes on to look at theories of personality development, the stages of development theories, key researchers in personality psychology, and the main influences on personality development. You will also delve into looking at basic personality traits, including values, beliefs, and nature versus nurture. You will learn about your own personality and how you can use that information in career choices and to make changes. You will also learn about some personality disorders and how to put all the information together to use it the your personal or career advantage. With this course you can literally stop wondering about why you or someone you know behaves a particular way. By the time you complete this course you will know how someone's personality development and how that information can be useful.					
	Objectives	At the end of the course, the student should be able: - To demonstrate understanding of personality theories - To explain how individual difference and environmental contexts influence developmental changes To account for the role of culture in shaping attitudes, values, and behaviors To integrate personality theories and theoretical concepts to foster effective practice through the work with individuals, families and community To develop a reflective and critically interactive perspective about the theories and concepts of personality To identify, describe, and apply the major theories of personality, including Psychoanalytic, Neopsychoanalytic, Lifespan , Trait, Humanistic, Cognitive, Behavioral, and Social Learning approaches To examine the philosophical assumptions, historical and cultural factors that underlie the development of each personality theory To analyze, compare, and utilize the major personality theories to assess case studies of personality disorders To develop a deeper self-understanding of their own personality and personality development.
